SUMMARY

Computer Science undergraduate specializing in AI, Machine Learning, and Generative AI, with hands-on experience building real-world intelligent systems including neurovascular imaging, emotion detection, trading analytics, and virtual assistants. Proven leadership as Technical Head at HackLoop and Campus Ambassador for Google Gemini and E-Cell IIT Bombay, with a trackrecord of leading projects, mentoring peers, and organizing tech initiatives. Skilled in Python, Java, React Native, Firebase, and Google Cloud, with a strong focus on solving complex problems through scalable AI solutions.

EXPERIENCE

HackLoop | Technical Head | Oct 2025 – May 2026

- Leading AI-based hackathon projects and overseeing system design.
- Mentoring developers and guiding technical strategy.

Google Gemini | Campus Ambassador | Aug 2025

Organizing AI awareness campaigns and workshops to promote Google Gemini tools.
Facilitating student engagement with GenAI technologies.

E-Cell IIT Bombay | Campus Ambassador | Aug 2025

Conducted entrepreneurship events and outreach initiatives to engage student innovators.

EDUCATION

B.Tech in Computer Science and Engineering (AI) | Sept, 2024 - May, 2028

ABES Institute of Technology, Ghaziabad

SKILLS

- **Programming Languages:** Python , HTML, CSS , React Native, Firebase
- **Frameworks s Libraries:** Next.js, React.js, Node.js, Express.js, Django, Flask, FastAPI, Redux, Tailwind, Framer Motion, GSAP, TensorFlow/PyTorch.
- **Databases:** MongoDB, MySQL, PostgreSQL, Firebase, Supabase
- **Backend Development:** RESTful APIs, GraphQL, Authentication & Authorization, WebSockets
- **Artificial Intelligence:** Generative AI, Prompt Engineering, Machine Learning , Deep learning, NLP , Open CV, Pandas/Numpy.
- **Tools s Platforms:** Git/GitHub, Docker, Kubernetes, Vertex AI, Gemini, Vercel, Google Cloud

PROJECTS

NeuroVessel AI (*Deep learning for neurovascular imaging*)

Uses deep learning to identify and segment neurovascular structures in imaging data, improving diagnostic efficiency and clinical decision making.

AURA AI Indicator (*AI trading app for market analysis*)

- Built an AI trading app that analyzes chart screenshots and predicts buy/sell/hold decisions using deep learning models.

JARVIS-Like Virtual Assistant (*Python-based automation assistant*)

- Created a Python-based assistant with speech recognition, automation, and face detection capabilities.

Emotional Companion AI (*Real-time emotion detection system*)

- Built a real-time emotion detection system using facial and voice analysis for empathetic interactions.

AI Teaching Assistant - Sahayak (*Classroom assistant for adaptive learning*)

- Developed a classroom assistant using Google Vertex AI and Gemini for adaptive learning support.

Lunar DEM Research (*High-resolution DEM generation*)

- Researching high-resolution DEM generation from mono lunar images to outperform NASA/ISRO models.

ACHIEVEMENTS & CERTIFICATIONS

- <CODE-A-THON 3.0> Runner Up
 - Google Cloud Computing Foundations and Generative AI
-
